ANATOMY AND PHYSIOLOGY
INFOMERCIAL PROJECT

PURPOSE: to investigate the details of a specific disease or medical condition of the student’s interest; to develop oral presentation skills by presenting this information to the class in a creative and informative manner. This presentation may be in the form of a power point presentation or video production.

RESEARCH:
1. Find Internet or library references which contain information about the disease or condition.
2. Find pictures and/or educational materials about your subject. (Examples: pamphlet, posters, photos, drawings, etc.)
3. Use your textbook as well as other relevant sources to look up words that you are unfamiliar with prior to your presentation.

WRITTEN REPORT:
1. Typed, double-spaced, 12-point easily legible font (5 points)
2. Include a cover sheet with your name, title of the case study, course name, period, and date. (5 points)
3. Include a list of 15 - 20 medical terms and definitions pertaining to the topic. (10 points)
4. Include a 2 -3 page summary of your topic. (20 points)
5. Include a bibliographical account of your research using MLA format. Minimum of 3 resources. (10 points)

ORAL PRESENTATION:
1. Introduce the background of your topic. Discuss the normal A&P of the system or body region applicable to your topic. Use visual aids (use me & class items as resources) (25 points)
2. Discuss the mechanism of injury or disease relevant to your topic. Use visual aids, x-rays, etc. (25 points)
3. Discuss any treatments or surgical interventions that may benefit your disease or condition. Use visual aids, pictures, video, etc. (25 points)
4. Summarize and field questions. (10 points)
5. Time frame of 10 - 15 minutes. (5 points)
6. Use of visual aids through out the presentation. (10 points)
