Explorations in Biomedical Research
Two-week research program for students currently in grades 10 and 11 from July 17-29
This program focuses on translational research, from discovery-based research to clinical therapeutics. This program connects high school students to researchers in interdisciplinary biomedical sciences to promote interest in and preparation for bioscience careers. Cost: $1000 Commuter; $2000 Residential

Florida Youth Institute
One-week residential program for students currently in grades 10 and 11 from July 10-15
FYI immerses students in various agriculture, life science, and natural resources disciplines to stimulate interest in and an appreciation for the range of college majors and career opportunities available in these areas. This program is sponsored by the College of Agricultural and Life Sciences at the University of Florida, in partnership with the Florida Department of Agriculture and Consumer Services. Cost: $350

Humanities and the Sunshine State
One-week residential program for students currently in grades 10 and 11 from June 12-18
Through an introduction to how various humanities disciplines study water, participants will explore contemporary political topics such as tourism, food justice, aquifer sustainability, industrial growth, and race relations. Planned activities include visits to special collections, field trips to local Florida landmarks, and social activities at the university. Cost: $350

Science Quest
One-week residential program in science for students currently in grade 9 from July 10-15 OR July 17-22
This program immerses students in various science disciplines to stimulate their interest and appreciation for the range of college and career opportunities available in science. Students will attend a variety of lectures and demonstrations, visit research laboratories and other facilities, and perform multiple science experiments. Cost: $850

STEAM Quest
One-week residential program for students currently in grades 10 and 11 from July 24-29
The STEAM (Science, Technology, Engineering, Arts, and Math) Quest summer program immerses students in various art and science disciplines to stimulate curiosity and appreciation for the range of art/science college degrees and career opportunities. Students visit laboratories and artists’ studios, enter the behind the scenes world of museums, and attend a variety of lectures, demonstrations and field trips. Cost: $850

Student Science Training Program
Seven-week residential research experience for students currently in grade 11 from June 12–July 30
SSTP is research program for students considering medicine, math, computer, science, or engineering careers. The program emphasis is research participation with a UF faculty and his or her research team. Students engage in the ongoing research of the faculty-mentor for 30 hours/week, attend a lecture series on current research topics, and participate in a UF honors seminar class. Cost: $4200
